\( \frac{1}{2} \)" Sheathing

Flashings

Exterior Substrate

Sealant Bead Behind Mounting Flange

Sealant Bead Between Mounting Flange and Flashing

Vertical Section

2 x 6 Framing

\( \frac{5}{6} \)" Drywall

Exterior

Interior

HEADER TO BOTTOM OF SLEEPER (RO)

1 3/6" extends past the framing to the exterior

8" Sleeper depth takes into account 6 3/6" from the exterior framing towards the interior and 1 3/6" extending past the exterior framing. The 1 3/6" extension is needed to support the outer track. 8" sleeper width does not take into account pans, membranes & sealant provided by others.
