

3750 Hybrid Folding Door Panel

Win-Dor's Hybrid Folding Door Panel is a 1 ¾" thick uPVC panel. The profile width is 3 ¾". It is reinforced with a tempered aluminum alloy. The corners of the panels are a thermally fused, welded joint. They will not separate or leak through out the life of the product. Panel designed with internally extruded multi chambers that improve the products energy efficiency. Win-Dor's Hybrid Folding Door has a U-Factor as low as 0.32 (using i89 glass) *see test results.
